

Pain & Arthritic Relief

YUCCA INTENSIVE

Anti-inflammatory 2 fl. oz., 8 fl. oz., 32 fl. oz.

An outstanding, proven safe, all natural supplement. Yucca contains steroidal saponins, which are nature's most powerful anti-inflammatory agents. **Clinically proven to rapidly promote symptom relief similar to steroid medications, with none of the side-effects.** Our product is pure concentrated extract, not powdered waste product (the result of extraction process) as found in capsules or other popular bulk products. Standardized extract contains over 85% bio-available saponins versus only 3% to 7% left in waste powder. Therefore, our product has the highest therapeutic steroidal benefits available! **Reduces pain as well as bute and aspirin without gastric side effects.** For arthritis, bone and joint problems, soft tissue swelling, digestive, bowel problems and colic. Tissue swelling reduces the blood flow through injured areas slowing recovery; toxins build up irritating the liver and kidneys. Yucca cleanses these organs, promotes blood flow and tissue repair, while preventing further degeneration and injured tissues. Reduces the "itch" of allergies, eliminating the need for steroid drug treatments. May reduce inflammation in brain areas responsible for seizure activity. Use topically for wound and hot spot treatment.

SHARK'RAH

60 gram powder **Pure Chondroitin Sulfate**

This pharmaceutical grade cartilage is far superior due to a substantially higher Mucopolysaccharide content (up to 20% more Chondroitin Sulfate than all other standard products), low ash and fat content and its solubility. Found to be beneficial in lubricating joints reducing pain from arthritis and injuries. Sharks are also highly touted for their remarkable anti-cancer DNA. Cartilage has also been used successfully in permanently reducing fatty and/or cancerous tumors.

Gluco M Chondro

90 tablets

Benefits a pet who could use all three supplements: Glucosamine, MSM, Chondroitin Sulphate. Highly effective for bone and joint conditions, allergies and skin repair. Can be used for symptom reversal or preventative protocols.

JOINT E'ZER

Pharmaceutical grade bulk powder

Highly concentrated combination of Glucosamine Sulfate and Chondroitin Sulfate makes hiding this powder in food much easier. This is the product to start with for joint and tissue rehabilitation. Can be used for prevention of arthritic joint conditions and growth issues. Chondroitin helps lubricate the joint while Glucosamine helps grow and repair joint tissue.

Best Seller

2 oz., 4 oz., 8 oz.

L-PHENYPET

L-Phenylalanine 60 caps

This natural amino acid is a powerful, non-addictive analgesic, found in clinical research to be as effective in relieving pain as morphine and opiates. It seems to be responsible for increasing the activity of brain endorphins believed to be involved in the analgesic response. Often helps pets have superior responses to other types of pain treatment. May also help alleviate depression from long-term pain or illness and reduce some seizure activity. May reverse chemical damage to brain tissue from drugs, pesticides and toxins.

MSM

(500 mg.) 100 capsules

Only 1/4 tsp. delivers 1 gram (1000mg.) *pharmaceutical* - 99.9% pure MSM, a derivative of DMSO. Dr. Newman first used MSM for joint stiffness and skin problems over twenty years ago. This complement to tissue healing herbal remedies and glucosamine use for arthritis has proven effective with Yucca Intensive for reducing chronic inflammation. **Azmira's** MSM is proven highly effective. Labels with non-listed % contain *MSM by-products*.
